INFORMATION SECURITY POLICY

Providing software development and digital transformation services , **Mangodo** takes the necessary precautions to protect the data of its stakeholders and implements the ISO 27001 Information Security Management System.

In this direction:

- To ensure the balance of the three basic elements of Information Security, Confidentiality, Integrity and Accessibility, in all our activities and to protect these elements in all information assets,
- To increase information security awareness with the participation of our employees,
- To comply with legal, contractual and regulatory requirements regarding information security,
- To take proactive measures against cyber threats and information security breaches,
- To continuously develop the infrastructure required for information security by closely following technology,
- To protect the information assets of our customers, employees, suppliers and business partners against unauthorized access, modification, disclosure and loss,
- To provide uninterrupted and safe service to our customers by ensuring business continuity,
- We are committed to the continuous improvement of our Information Security Management System.
